Installation

To ensure normal operation and electricity generation of the solar panel, it must be installed in a place with sufficient sunlight throughout the day, and avoid shading or obstruction of the panel by debris.

1. Install the Bracket

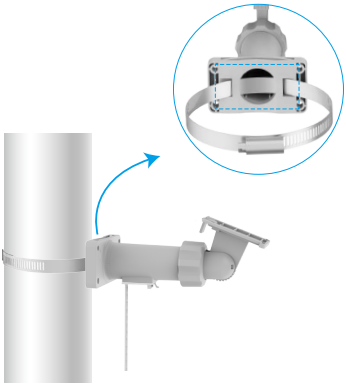

Method 1: Wall Mounting

1. (For the cement wall/ceiling only) Choose a clean and flat wall, drill screw holes and insert anchors.
2. Use screws to fix the bracket

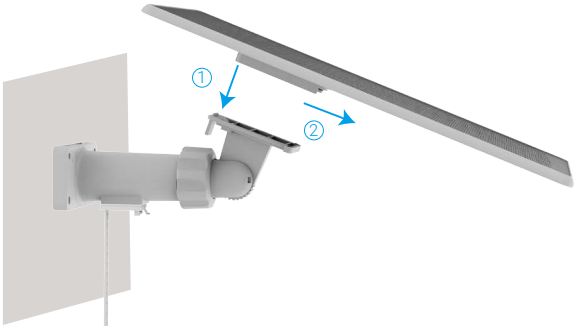

Method 2: Pole Mounting

1. Use the hoop(Purchase separately) to fix the mounting bracket to a pole.

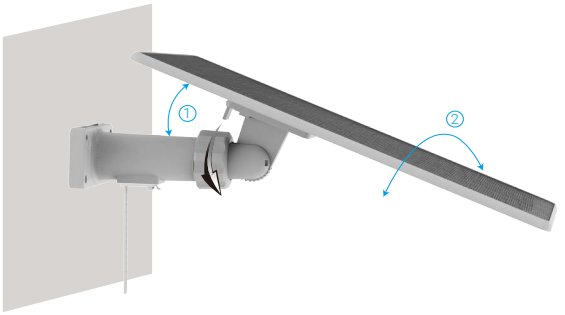

2. Install the Solar Panel

1. Align the top of the bracket with the groove on the back of the solar panel, slide the solar panel down until you hear a click, indicating that the solar panel is completely installed on the bracket.

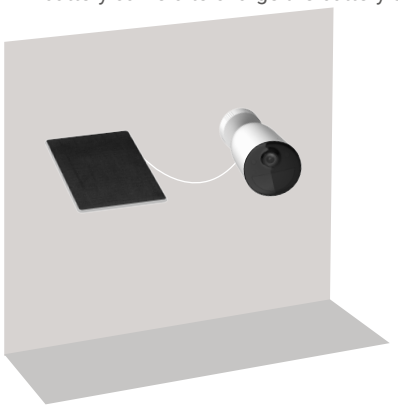

2. Loosen the gear in the direction shown in the figure, and refer to ① to adjust the angle between the solar panel and the bracket vertically or refer to ② to adjust the orientation of the solar panel horizontally.

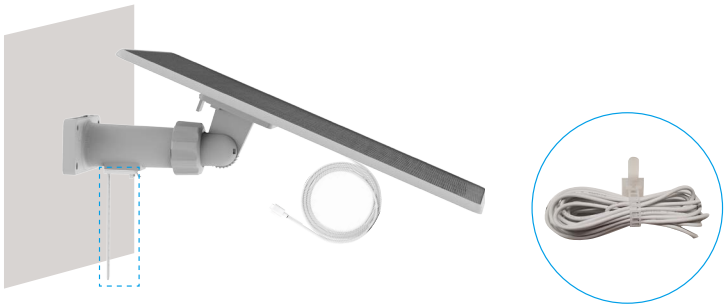

Connect with Camera

1. Connect the solar panel with EZVIZ battery camera to charge the battery camera.

2. If the power cable is too long, the cable clips on the bracket can be used for storage.

- In order to protect the battery of the camera, the device will automatically stop charging the battery when the internal battery exceeds the safe temperature (affected by environmental temperature, light intensity, etc.).
- Please clean the surface of the solar panel in a timely manner to avoid affecting the electricity generation of the device.
